

Altek[®]

waiting area solutions

ALTEK ITALIA DESIGN

is an Italian manufacturing company dedicated to the study of innovative and original furniture for all the common areas, included lounge, work and public spaces.

The company reflects the heritage of four generations, which have been involved since 1920 in the production of furniture.

The passionate study and dedication in developing exquisite Italian design products has been the reason for the success of Altek Italia Design.

The high reputation gained in the international arena has led the company to work with over forty Countries all over the World.

1920

In their artisan workshop Giuseppe Baggio and his son Vittorio Senior start to manufacture wooden chairs with handmade straw seats

1940

The workshop becomes the "Baggio Vittorio & Figli" Company. They create and patent the first wooden kneeling chair and the first adjustable deck chair

1960

Vittorio Baggio Junior with his brother Carlo and his sister Maria, establish the "I.S.E.A Baggio" company and begin to make metal chairs that shortly will start to be exported abroad

1980

The company achieves its highest expansion and becomes Italian market leader with a daily production of 7.000 chairs and tables, exported all over the world

1990

Franco and Silvia Baggio join the father Vittorio and create the Altek brand, a new line of patented articles designed with the most prestigious Italian and European designers.

2000

The brand Altek becomes "Altek Italia Design" with focus on research and development with new collection for common spaces characterized by modularity & innovation

ALA

Seating for gate lounges and public areas

Modular, safe, innovative.

The premium waiting room range with lots of options.

Waiting at the highest level, comfortable and safe for the guest and maintenance-friendly for the operators.

Thanks to its modular structure, it's very adaptable: the system can be connected at right angles, back-to-back or in rows one behind the other.

Add to this the appropriate finishes for contract use and the right materials: cast aluminium base and arms, aluminium structure, first quality hard-leather or synthetic leather.

Power supply via power sockets, easy to reach, mounted on the side of the seats so that the waiting passengers can recharge their mobile phone, batteries or hook up their laptops.

Product protected by international patent.

MOLECOLA

Modular seating system for public areas

This versatile modular system consisting of only four organically shaped elements gives a touch of originality and evokes a much more informal and playful atmosphere to the public waiting and lounge areas.

The attachable elements offer a wide variety of possibilities for pleasant space creativity.

The result is an harmonious language of forms expressed by its sinuous curves and circles.

A further special feature: you can sit or relax on different sides of the sofa.

This creates new spatial landscapes ideally suitable for lounges, atriums and waiting areas.

MOLECOLA | Possible modular configuration

CUNEO

Bench system for waiting areas

Minimal design, continuation of sinuous lines for this collection of versatile and functional bench for waiting areas.

The frame is made of wood, upholstered in leather or fabric.

CUNEO | Possible modular configuration

HUB

Modular seating system for public areas

HUB is a system of sofas and other elements, which can be recomposed, generating different transit or waiting areas in a game of soft interlocking shapes.

The advantage of this a modular sofa system is the possibility to create a more fitting solution to the area's requirements by fitting together the available modules into the desired configuration.

The modules include, but are not limited to: armrests, backrests, seat elements, ottomans, planters and magazine rack.

These are available in different finishes and colours.

LIBRA

Lounge chair for public areas

Versatile and compact chair with a curved and cosy seat, like a nest.

Durable and solid for contract use but comfortable and warm like a domestic lounge chair. It can be upholstered in leather, synthetic leather or fabric.

ARACNO

Sofa for waiting areas

*ARACNO has its own strong personality
and it is not just a soft, versatile and functional sofa.*

*This interesting sofa places the spotlight on the spaces
thanks to its incredible integration power.*

*Steel structure in chrome finish and upholstered
seat and back in leather or fabric.*

SINAPSI

Modular soft seating for public and transit areas

Minimal design for unlimited possibilities of connection to create different lines and new shapes.

Its superb strength and durability, makes it the ideal solution for high traffic, intensive use reception areas and public spaces.

Sinapsi offers incredible versatility: as a bench can be linked or unlinked and it can be easily reconfigured.

The structure is in steel and the wooden seat can be upholstered in a large range of fabrics, synthetic leather or real leather.

italian lifestyle

ERMES

Table for public and transit areas

This small table is ideal for public transit area, where communication and privacy are necessary.

The soundproof panel, covered with synthetic leather or fabric, guarantees discretion whether you had to make a call or you just had to check your personal documents. The power socket, without any visible cable, is the essential detail for your mobile devices.

The steel structure and the acrylic-stone top make this small table perfect and durable for contract use.
